in Cleopatra mandarin root, leaf abscission and, 401
deficiency of, heat induction of Pin2 in, in potato and tomato, 853
potato leaf treated with, lipoxygenase in, 446
stomatal closure and, in flooded tomato plants, 239
Abscisic acid-responsive elements, in rice, 483
Acetylserine sulfhydrylase isoenzyme, in *Datura innoxia* cells, 659
Adenosine diphosphate/ATP carrier, in corn mitochondria, 845
Adenosine diphosphate-glucose pyrophosphorylase
allosteric functioning of, aspartic acid 413 and, 1315
in corn endosperm, 779
in potato, 1399
in rice endosperm, 1399
Adenosine triphosphate sulfurylase gene, *SAC1* control of, in *Chlamydomonas reinhardtii*, 669
Aerenchyma formation, in corn root, ethylene biosynthesis and, 1679
Aerenchyma, in corn
ethylene signal transduction and, 463
flooding-induced xyloglucan *endo*-transglycosylase homolog and, 385
Agarose, flax protoplast immobilization in, 1191
Agave guadalajarana, leaf of, carbon partitioning in, 393
Agrobacterium tumefaciens AKE10, in tobacco leaf, growth and regeneration and, 939
Air humidity, ammonia flux between oilseed rape plant and, 67
Alachlor sensitivity, corn glutathione *S*-transferase and, 1595
Alanine:α-ketoglutarate aminotransferase, in *Chlamydomonas reinhardtii*, 677
Alcohol dehydrogenase-1-β-glucuronidase, in oxygen-derived corn root, 685
Alfalfa
regrowth of, nitrogen and carbon flows in, 281
Rhizobium-induced peroxidase gene in, 1437
stress responses in, 717
Alga (*see also specific alga*)
unicellular green, xenobiotic biotransformation in, 361
Alginate bead, flax protoplast immobilization in, 1191
Allium cepa (*see* Onion)
Aloevera, leaf of, carbon partitioning in, 393
Aluminum
early entry of, into soybean root, 1289
toxicity of, in yeast, 1101
Aluminum tolerance
in phosphate-starved tobacco, 217
in wheat, 591, 1471
zucchini root growth inhibition and, 1135
Amaranth, mitochondria of, C_4 photosynthetic NAD-dependent malic enzyme expression in, 473
1-Aminocyclopropane-1-carboxylate oxidase, pollination-induced, in petunia flower, 503
1-Aminocyclopropane-1-carboxylate synthase
in *Dendrobium crumenatum*, 863
in apple fruit, 1736
Ammonia flux, between oilseed rape plant and atmosphere, 67
β-Amylase, ubiquitous, in wheat leaf, 1737
Annexins p33 and p35, in corn root tip, 1391
Antioxidant
foliar, growth irradiance and, in evergreens, 1631
salt stress and, in cotton, 803
Antirrhinum majus, petal of, epidermal cell shape and pigmentation and, 879
Apium graveolens (*see* Celery)
Apoprotein, stabilization of, in barley etioplast, 633
Apple fruit, 1-aminocyclopropane-1-carboxylate synthases in, 1736
Arabidopsis thaliana
biotin synthase in, 371
catalase encoding by, 327
chloroplast of
de-etiolation and, 1465
division in, 149
glyceraldehyde-3-phosphate dehydrogenase in, 1563
CPD photolyase homology in, 862
cyclin transcript level in, 1023
CYP89 in, 445
expressed sequence tag assemblies in, 1177
flowering time in, 862
G-box-binding factor 1 in, 1399
gibberellin responsiveness of, phytochrome B and, 337
H^+-ATPase isoforms in, 833
heat shock protein in, localization of, 747, 1399
importin-α homolog in, 1398
indoleacetic acid-amino acid conjugate resistance in, 735
isoperoxidases in, 446
Lhcb transcription in, cell size and chlorophyll accumulation and, 953
MAP kinase kinase-related DNA in, 1397
mitochondria of
F1-ATPase in, 1737
heat shock protein in, 1399
mixta-homologous myb-domain protein in, 863
Na^+-coupled K^+ transport in, 1609
nph mutants of, transduction and response components of, 291
p40-like protein in, 446
purine synthesis in, 905
root hairs of, electrical properties of, 1089
root of, parasitic nematode induction of phloem unloading in, 1421
Rubisco activase transcription in, circadian regulation of, 43
seed of, small heat shock proteins in, 747
seedling of
cytokinin restoration of gravitropism to, 901
light control of, 871, 901, 965
senescence in, 705
serine metabolism in, 207
sinapic acid ester metabolism in, 1625
threonine synthase in, 863
Arabinogalactan protein, heterogeneity of, on rose plasma membrane, 1261
Arginase, in tomato ovaries, 1237
Arginine decarboxylase
in carnation flower, 863
in tomato ovaries, 1237
Ascorbate
metabolism of, zucchini root growth inhibition and, 1135
onion root elongation by, 1119
photophosphorylation stimulated by, in spinach thylakoid, 1509
Asparagine synthetase gene, in asparagus, 1397
Asparagus, asparagine synthetase gene in, 1397
Aspartate 413, ADP-glucose pyrophosphorylase allosteric functioning and, 1315
Aspartate transcarbamoylase, in pea, 446
Atmosphere, ammonia flux between oilseed rape plant and, 67
Atrazine resistance, soybean serine mutation and, 1499
Atriplex rosea, photosynthetic apparatus of, light energy distribution in, 1055
Auxin
ethylene-mediated sensitivity to, *Rumex palustris* root formation and, 1687
indoleacetic acid metabolism and, in carrot hypocotyl, 549
pea fruit growth and, 53
salt stress and, in tomato, 379

B

Bacillus thuringiensis
in canola, dose effects and insect control of, 115
in soybean, recovery and characterization of, 121
Bacteria
hypersensitive response to, 865
induction of pea root defenses by, 919
Barley
cDNA clone pHVCR21 and, 445
etioplast of, chlorophyll synthesis and apoprotein stabilization in, 633
3-hydroxy-3-methylglutaryl-coenzyme A reductase kinase in, 1141
microbial rhizoferrin iron uptake by, 1273
Na^+-coupled K^+ transport in, 1609
photosystem I of, cross-linking studies of, 409
photosystem II-associated protein in, 1398

root of, nitrate efflux system in, 1167
Bean, photosynthesis in, temperature and, 1245, 1253
Beet (*see* Red beet)
Bell pepper, fruit-specific defensin in, 615
Berberine bridge enzyme gene, in opium poppy, 1669
Bertholletia excelsa (*see* Brazil nut)
Beta vulgaris (*see* Red beet)
Bicarbonate transport, in *Synechococcus*, 1573
Biotin synthase, in *Arabidopsis thaliana*, 371
Blue light, gametogenesis dependence on, in *Chlamydomonas reinhardtii*, 303
Boron deficiency, zucchini root growth inhibition and, 1135
Brassica, β-glucosidase in, phosphate starvation-inducible, 1399
Brassica juncea (*see* Mustard)
Brassica napus (*see* Canola; Castor bean; Oilseed rape)
Brassica nigra, phosphate-starved, pyrophosphate-dependent phosphofructokinase in, 343
Brassica oleracea, *SLR1* gene promoter in, functional analysis of, 1601
Brazil nut, 2S albumin from, vacuolar targeting signal of, 975
Bromheadia finlaysoniana, phenylalanine ammonia-lyase in, 863
Buthionine sulfoximine, salt stress and, in cotton, 803

C

C_4 plant photosynthesis
light energy distribution in, 1055
mitochondrial NAD-dependent malic enzyme in, 473
Caffeoyl coenzyme A 3-*O*-methyltransferase, in alfalfa stress response, 717
Callus, of rice, polyamine accumulation and morphogenesis in, 1343
Calmodulin, and carrot cortical microtubules, 1079
Calmodulin-like protein, salt stress-related, in *Dunaliella salina*, 863
Caltractin-like protein, in *Dunaliella salina*, 445
Canola (*see also* Castor bean; Oilseed rape)
Bacillus thuringiensis in, dose effects and insect control of, 115
Capsicum annuum (*see* Bell pepper)
Carbon
in alfalfa regrowth, 281
partitioning of, in crassulacean acid metabolism species leaf, 393
transport of, in *Synechococcus*, ethoxyzolamide inhibition of, 79
Carbon dioxide
in cucumber, hydroxypyruvate reductase gene expression and, 599
Lupinus albus root fixation of, in phosphorus deficiency, 19
in pea leaf, carbonic anhydrase and Rubisco expression and, 569
soybean mitochondrial respiration and, 1349
Carbonic anhydrase
in pea leaf, CO_2 concentration and, 569
in tobacco chloroplast, gas exchange and isotope discrimination in, 319
Carnation flower, arginine decarboxylase in, 863
Carrot
cortical microtubules of, calmodulin and, 1079
embryo of, genetic characterization of, 1365
hypocotyl of, indoleacetic acid metabolism in, auxins and, 549
neutral and alkaline invertase in, 1513
Castor bean, peroxisomes of, isocitrate lyase in, 1457
Catalase, *Arabidopsis thaliana* gene encoding of, 327
Celery, mannitol dehydrogenase immunolocalization in, 931
Cell death, hypersensitive response and, bacterial elicitation of, 865
Cell wall
of corn root, biosynthesis in, 3,7-dichloroquinolinecarboxylic acid and, 1383
of pea, invertase gene in, wound induction of, 1111
peroxidase in, ascorbate-stimulated onion root elongation and, 1119
Ceratodon, CpPHY2 (PHYCER2) in, 446
Chlamydomonas reinhardtii
alanine:α-ketoglutarate aminotransferase in, 677
ATP sulfurylase gene expression in, *SAC1* control of, 669
blue light-dependent gametogenesis in, 303
copper uptake in, 697
glutamine synthetase gene in, 987
Mg-protoporphyrin IX monomethyl ester (oxidative) cyclase in, 105
photosynthesis-respiration interaction in, 1005
salt-sensitive mutant of, 99
Chlorella fusca, xenobiotic biotransformation in, 361
Chlorophyll
accumulation of, *Arabidopsis thaliana hcb* transcription and, 953
breakdown of, in senescent leaves, 1403
deficiency of, in wheat, thylakoid membranes and, 821
synthesis of, in barley etioplast, 633
Chlorophyll *a*/*b*-binding protein, in mustard, 1737
Chloroplast
of *Arabidopsis thaliana*
de-etiolation and, 1465
division of, 149
glyceraldehyde-3-phosphate dehydrogenase in, 1563
inner envelope vesicles of, nitrite transport in, 1375
lipid membrane of, proton permeation through, 759
of potato, transketolase structure in, 1736
of *Salix discolor*, thylakoid-bound isoprene synthase in, 171
of spinach
coenzyme A-binding protein in, 1641
SecY protein in, 863
of tobacco
carbonic anhydrase in, gas exchange and isotope discrimination in, 319
Fe-superoxide dismutase in, oxidative stress tolerance and, 1703
glucose-6-phosphate dehydrogenase in, 861
of wheat, Cu/Zn superoxide dismutase in, 1738
Chlorosis, cool temperature-induced, in rice, 585
Cinnamate 4-hydroxylase, in *Populus tremuloides* xylem, 861
Cinnamyl alcohol dehydrogenase
in *Pinus radiata*, 1397
in poplar, 1479
Circadian clock, Rubisco activase transcription regulation by, in *Arabidopsis thaliana*, 43
Citrus reshni (*see* Cleopatra mandarin)
Cleopatra mandarin, leaf of, abscission in, root abscisic acid and, 401
Coenzyme A-binding protein, in spinach chloroplast, 1641
COP/DET/FUS genes, in light control of *Arabidopsis thaliana* seedling development, 871
Copper superoxide dismutase, in wheat chloroplast, 1738
Copper uptake, in *Chlamydomonas reinhardtii*, 697
Corn
aerenchyma formation in
ethylene signal transduction and, 463
flooding-induced xyloglucan *endo*-transglycosylase homolog in, 385
endosperm of, ADP-glucose pyrophosphorylase in, 779
glutathione *S*-transferase in, alachlor sensitivity of, 1595
leaf of, sucrose synthase phosphorylation in, 793
microbial rhizoferrin iron uptake by, 1273
mitochondria of, ADP/ATP carrier in, 845
root of
annexins p33 and p35 in, 1391
arenchyma formation in, ethylene biosynthesis and, 1679
cell wall biosynthesis in, 3,7-dichloroquinolinecarboxylic acid and, 1383
hypoxically inducible lactate dehydrogenase in, 1015
oxygen deprivation of, alcohol dehydrogenase-1-β-glucuronidase in, 685
phytase in, 1429
Cortical microtubules, of carrot, calmodulin and, 1079
Cotton
FbL2A gene in, tissue-specific and developmental regulation of, 1331
GTPase *Rac13* in, prenylation of, 1491
hydraulic architecture in, ozone and, 1649
salt stress in, antioxidant response to, 803
4-Coumarate:coenzyme A ligase, in tobacco, 193
CP47, in spinach, 446
CPD photolyase, *Arabidopsis thaliana* protein homology to, 862
CpPHY2 (PHYCER2), in *Ceratodon*, 446
Crassulacean acid metabolism species, leaf of, carbon partitioning in, 393
Cucumber

hydroxypyruvate reductase in, CO_2 concentration and, 599
tobacco necrosis virus infection in, salicylic acid transport in, 787
Cucumis sativus (*see* Cucumber)
Cucurbita pepo (*see* Zucchini)
Cyanobacterium (*see Synechococcus*)
Cyclin
C-type, in rice, 862
transcript level of, in *Arabidopsis thaliana*, 1023
CYP89, in *Arabidopsis thaliana*, 445
Cysteine, synthesis of, cellular localization of, in *Datura innoxia*, 659
Cysteine proteinase, in *Vicia faba*, 862
Cysteine proteinase inhibitor genes, in soybean, wounding and methyl jasmonate and, 1201
Cysteine synthase isoforms, in spinach, 273
Cytochrome P450, in metflurazon activation and selectivity, 361
Cytochrome P450 monooxygenase, in plant-insect interactions, 1411
Cytokinin
Arabidopsis thaliana seedling gravitropism and, 901
metabolism of, in *ipt* transgenic tobacco, 141
Sesbania rostrata SrEnod2 early nodulin gene regulation by, 559
in tobacco, *ipt* gene transcription and, 1035
Cytokinin oxidase, in tobacco, *ipt* gene transcription and, 1035

D

Datura ferox, solar UV-B effects on, 161
Datura innoxia, cysteine synthesis in, cellular localization of, 659
Daucus carota (*see* Carrot)
Deamino-NADH oxidation, ubiquinone induction of, in potato tuber mitochondria, 75
Defensin, fruit-specific, in bell pepper, 615
Dendrobium crumenatum, 1-aminocyclopropane-1-carboxylate synthase in, 863
De-N-glycosylation enzyme, in radish seed, 259
3,7-Dichloroquinolinecarboxylic acid, corn root cell wall biosynthesis and, 1383
Digitaria sanguinalis, photosynthetic apparatus of, light energy distribution in, 1055
DIMINUTO homolog, in pea, 862
Drought stress, in wheat, photosynthetic electron allocation in, 265
Dunaliella
caltractin-like protein in, 445
plasma membrane H^+-ATPase in, structure and pH effects on, 1693
salt stress-related calmodulin-like protein in, 863

E

E8 gene, of tomato, ethylene biosynthesis and, 537
Elaeis guineensis, stearoyl-acyl-carrier protein in, 1399
Electrical properties, of *Arabidopsis thaliana* root hairs, 1089
Electronic Plant Gene Register (*see* Plant Gene Register)
Embryo
of carrot, genetic characterization of, 1365
of pea, soluble and granule-bound starch synthase in, 89
of rice, ferredoxin-$NADP^+$ oxidoreductase in, 1399
Embryogenesis, somatic, of carrot, 549
Endoprotease, during wheat grain development, 1211
Endosperm
of corn, ADP-glucose pyrophosphorylase in, 779
of rice, ADP-glucose pyrophosphorylase in, 1399
Enterobacter agglomerans, indoleacetic acid hydrolase from, 1281
Epidermal cell shape, *Antirrhinum majus* petals and, 879
Escherichia coli, functional expression of potato fumarate hydratase in, 1219
Espressed sequence tags, in *Arabidopsis thaliana*, 1177
Ethoxyzolamide, inhibition of dissolved inorganic carbon transport in cyanobacterium by, 79
Ethylene
auxin sensitivity mediated by, *Rumex palustris* root formation and, 1687
biosynthesis of
in corn root, aerenchyma formation and, 1679
in drained *vs.* submerged *Rumex*, 229
tomato *E8* gene and, 537
signal transduction by, in corn
aerenchyma formation and, 463
flooding-induced xyloglucan *endo*-transglycosylase homolog and, 385
Etioplast, of barley, chlorophyll synthesis and apoprotein stabilization in, 633
Eukaryotic ribosomal protein L9, pea homolog of, 863
Euphorbia maculata, photosynthetic apparatus of, light energy distribution in, 1055
Evergreen, foliar antioxidant systems in, growth irradiance and, 1631

F

Farnesyltransferase
in tobacco, 1398
in tomato, 767
F1-ATPase, in *Arabidopsis thaliana* mitochondria, 1737
FbL2A gene, in cotton, tissue-specific and developmental regulation of, 1331
Ferredoxin isoprotein, in tomato fruit, 651
Ferredoxin-$NADP^+$ oxidoreductase
in pea root, 861
in rice embryo, 1399
Fe-superoxide dismutase, in tobacco chloroplast, oxidative stress tolerance and, 1703
Field, symbiotic N_2 fixation in, in *Trifolium repens*, 575
Flax, protoplast of, immobilization of, in agarose and alginate beads, 1191
Flooding
of tomato plant, stomatal closure and, 239
xyloglucan *endo*-transglycosylase homolog induced by, in corn, 385
Flower
meristem of, 5
of *Arabidopsis thaliana*, 862
of carnation, arginine decarboxylase in, 863
of petunia, pollination-induced 1-aminocyclopropane-1-carboxylate oxidase in, 503
of *Phalaenopsis*, pollination-induced senescence of, 863
Fruit
of apple, 1-aminocyclopropane-1-carboxylate synthases in, 1736
defensin specific for, in bell pepper, 615
of papaya, metallothionein-like protein in, 1736
of pea, growth of, auxin and gibberellin and, 53
of peach, pectin esterase in, 864
of tomato
ethylene biosynthesis in, 537
ferredoxin isoprotein distribution in, 651
sugar composition and size in, invertase gene and, 1321
Fucus, zygotes of, germination regions of, 1401
Fumarate hydratase, potato, functional expression of, in *Escherichia coli*, 1219
Fungus, parsley leaf infected with
rapid cell death in, 433
tissue distribution of mRNAs and proteins in, 131

G

G box-binding factor 1, in *Arabidopsis thaliana*, 1399
G protein, in *Lupinus luteus*, 1399
Gametogenesis, blue light-dependent, in *Chlamydomonas reinhardtii*, 303
Gibberellin
Arabidopsis thaliana responsiveness to, phytochrome B and, 337
in pea *lip1* mutant, 61
pea fruit growth and, 53
signal transduction by, genetic analysis of, 11
Gibberellin-induced receptor-like kinase, in deepwater rice, 1397
Glucose-6-phosphate dehydrogenase, in tobacco chloroplast, 861
β-Glucosidase, phosphate starvation-inducible, in *Brassica* species, 1399
Glutamate dehydrogenase, from dark-grown soybean mitochondria, 1357
Glutamine synthetase
in *Chlamydomonas reinhardtii*, 987
during soybean nodule development, 1723
γ-Glutamyl hydrolase, in soybean leaf, 862
Glutathione
salt stress and, in cotton, 803
synthesis of, in *Populus tremula* x *Populus alba* leaf, 1071
Glutathione *S*-transferase
in corn, alachlor sensitivity of, 1595
in soybean hypocotyl, 1185
Glyceraldehyde-3-phosphate dehydrogenase, in *Arabidopsis thaliana* chloroplast, 1563

sn-Glycerol-3-phosphate acyltransferase, plastidal, in spinach, 1735
Glycine decarboxylase complex, in developing pea leaf, 1523
Glycine max (*see* Soybean)
Glycopeptide elicitor, binding site for, in tomato microsomal membrane, 1659
Glycyrrhiza glabra, polyketide reductase in, 864
Gossypium hirsutum (*see* Cotton)
Grain, of wheat, endoprotease during development of, 1211
Green fluorescent protein gene, as marker, 893
Growth irradiance, foliar antioxidant systems and, in evergreens, 1631
GTPase *Rac13*, in cotton, prenylation of, 1491
Guard cell, stomatal, of red beet, totipotence of, 889

H

H^+-ATPase
in *Arabidopsis thaliana*, 833
in *Dunaliella* plasma membrane, structure and pH effects on, 1693
in tomato, sugar regulation of, 1229
Heat shock protein, small, in *Arabidopsis thaliana*, 747, 1399
Hemicellulose biosynthesis, soybean UDP-glucose dehydrogenase and, 1127
Histone H4 cDNA, in *Sesbania rostrata*, 1398
Histone variant 3.3, in tomato, 1397
Hordeum vulgare (*see* Barley)
Hoya carnosa, leaf of, carbon partitioning in, 393
4-Hydroxybenzoate glucoside, accumulation of, tobacco *ubiC* gene and, 811
3-Hydroxy-3-methylglutaryl coenzyme A reductase gene, in tomato, 727
3-Hydroxy-3-methylglutaryl-coenzyme A reductase kinase, in barley, 1141
Hydroxypyruvate reductase, in cucumber, CO_2 concentration and, 599
Hypersensitive response, bacteria elicitation of, 865
Hypocotyl
of carrot, indoleacetic acid metabolism in, auxins and, 549
of soybean, glutathione *S*-transferase in, 1185
Hypoxia (*see* Oxygen stress)

I

Importin-α homolog, in *Arabidopsis thaliana*, 1398
Indoleacetic acid, in tomato root, salt stress and, 379
Indoleacetic acid hydrolase, from *Enterobacter agglomerans*, 1281
Indoleacetic acid-phenylalanine conjugate, resistance to, in *Arabidopsis thaliana*, 735
Insects
Bacillus thuringiensis canola and, 115
Datura ferox attraction of, solar UV-B and, 161
plant interaction with, cytochrome P450 monooxygenase in, 1411
Invertase
neutral and alkaline, in carrot, 1513
tomato fruit sugar composition and size and, 1321
ipt transgenic tobacco, cytokinin in, 141, 1035
Iron, from rhizoferrin, gramineous plant uptake of, 1273
Isocitrate lyase, import of, into castor bean peroxisomes, 1457
Isoperoxidases, in *Arabidopsis thaliana*, 446
Isoprene synthase, thylakoid-bound, in *Salix discolor* chloroplast, 171

J

Jasmonic acid
biosynthesis of, in abscisic acid-deficient potato and tomato, 853
defense gene induction by, in parsley and tobacco, 183
soybean cysteine proteinase inhibitor gene expression and, 1201

K

Kalanchoe, leaf of, carbon partitioning in, 393

L

Lactate dehydrogenase, hypoxically inducible, in corn root, 1015
LEA5-like protein, in soybean, 1398
Leaf
of Cleopatra mandarin, abscission in, root abscisic acid and, 401
of corn, sucrose synthase phosphorylation in, 793
of crassulacean acid metabolism species, carbon partitioning in, 393
of oilseed rape, temperature of, ammonia flux and, 67
of parsley, fungus-infected, tissue distribution of mRNAs and proteins in, 131
of pea
carbonic anhydrase and Rubisco expression in, CO_2 concentration and, 569
glycine decarboxylase complex in, 1523
of *Populus tremula* x *Populus alba*, glutathione synthesis in, 1071
of potato, abscisic acid-treated, lipoxygenase in, 446
senescent, chlorophyll breakdown in, 1403
of soybean, γ-glutamyl hydrolase in, 862
of tobacco
Agrobacterium tumefaciens AKE10 infection in, growth and regeneration and, 939
NAD(P)H:(quinone-acceptor) oxidoreductase in, 249
of wheat, ubiquitous β-amylase in, 1737
Legume, *Rhizobium*-induced nodule formation on, signal transduction in, 447
Lhcb transcription, in *Arabidopsis thaliana*, cell size and chlorophyll accumulation and, 953
Light (*see also* Blue light; Red light; Ultraviolet-B radiation)
Arabidopsis thaliana seedling development and
COP/DET/FUS genes in, 871
cytokinin and, 901
phytochrome and, 965
energy from, distribution of, in photosynthetic apparatus of C_4 plants, 1055
intensity of
ammonia flux between oilseed rape plant and, 67
soybean serine mutation and, 1499
Light-responsive element, ancestral multipartite units in, 1151
Linum usitatissimum (*see* Flax)
Lipid membrane, of chloroplast, proton permeation through, 759
Lipoxygenase
in abscisic acid-treated potato leaf, 446
in potato tuberization, 446
in tobacco-*Phytophthora parasitical nicotianae* interaction, 997
Ltp1 gene, in tobacco, 513
Lupinus albus, phosphorus deficiency in, root carbon dioxide fixation in, 19
root development in, 31
Lupinus luteus, G protein in, 1399
Lycopene cyclase, in *Narcissus pseudonarcissus*, 1398
Lycopersicon esculentum (*see* Tomato)

M

Magnesium, in yeast aluminum toxicity, 1101
Magnesium-protoporphyrin IX monomethyl ester (oxidative) cyclase, in *Chlamydomonas reinhardtii* and *Synechocystis*, 105
Mahonia repens, foliar antioxidant systems in, growth irradiance and, 1631
Maize (*see* Corn)
Malic enzyme, C_4 photosynthetic NAD-dependent, in amaranth mitochondria, 473
Mandarin leaf abscission, root abscisic acid and, 401
Mannitol dehydrogenase, immunolocalization of, in celery, 931
Mannose-binding lectins, of monocots, 1531
MAP kinase kinase (*see* Mitogen-activated protein kinase kinase)
Medicago sativa (*see* Alfalfa)
Meristem, floral, 5
Metallothionein-like gene, induction of, by wounding and tobacco mosaic virus infection, 353
Metallothionein-like protein
in papaya fruit, 1736
in *Trifolium repens*, 446
Metflurazon, activation and selectivity of, cytochrome P450 in, 361
Methyl jasmonate (*see also* Jasmonic acid)
soybean cysteine proteinase inhibitor gene expression and, 1201
Microtubule, cytoplasmic, 455
Mitochondria
of amaranth, C_4 photosynthetic NAD-dependent malic enzyme expression in, 473
of *Arabidopsis thaliana*
F1-ATPase in, 1737
heat shock protein in, 1399
of corn, ADP/ATP carrier in, 845

of potato tuber, deamino-NADH oxidation in, ubiquinone induction of, 75
of red beet, inducible NAD(P)H dehydrogenase in, 607
of soybean
glutamate dehydrogenase from, 1357
respiration of, CO_2 elevation and, 1349
Mitogen-activated protein kinase kinase, in *Arabidopsis thaliana*, 1397
Monocot, mannose-binding lectins of, 1531
Mosaic virus infection, tobacco (*see* Tobacco mosaic virus infection)
Mustard, chlorophyll *a*/*b*-binding protein in, 1737
Myb-domain protein, mixta-homologous, in *Arabidopsis thaliana*, 863
Myb-related cDNA, in tomato, 445

N

NAD-dependent malic enzyme, C_4 photosynthetic, in amaranth mitochondria, 473
NAD(P)H dehydrogenase, inducible, in red beet mitochondria, 607
NAD(P)H:(quinone-acceptor) oxidoreductase, in tobacco leaf, 249
Naphthylphthalamic acid-binding protein, orientation of, in zucchini plasma membrane vesicle, 421
Narcissus pseudonarcissus, lycopene cyclase in, 1398
NarL homolog, in *Synechococcus*, 1398
Necrosis virus infection (*see* Tobacco necrosis virus infection)
Needles, of Norway spruce, sucrose-phosphate synthase in, annual changes of, 641
Nicotiana (*see* Tobacco)
Nitrate and nitrite reductase, co-suppression of, in tobacco, 1447
Nitrate efflux system, in barley root, 1167
Nitrite transport, in chloroplast inner envelope vesicles, 1375
Nitrogen
in alfalfa regrowth, 281
spinach cysteine synthase isoform expression and, 273
symbiotic fixation of, in *Trifolium repens*, 575
Nodule
Rhizobium-induced, signal transduction in, 447
of soybean, glutamine synthetase activity during, 1723
Norway spruce needles, sucrose-phosphate synthase in, annual changes of, 641
nph Arabidopsis thaliana mutants, transduction and response components of, 291
Nut (*see* Brazil nut)
Nutrition, sulfur, in soybean, 623

O

Oilseed rape (*see also* Canola; Castor bean) ammonia flux in, atmosphere and, 67
Onion, root of, ascorbate elongation of, 1119
Opium poppy, berberine bridge enzyme genes from, 1669
Ornithine decarboxylase, in tomato ovaries, 1237
Oryza sativa (*see* Rice)
Ovary, of tomato, arginase, arginine decarboxylase, ornithine decarboxylase, and polyamines in, 1237
Oxidative stress
potato seed tubers in, 1301
tobacco chloroplast Fe-superoxide dismutase and, 1703
Oxygen stress, in corn root
aerenchyma formation and, 463
alcohol dehydrogenase-1-β-glucuronidase in, 685
ethylene biosynthesis and, 1679
lactate dehydrogenase inducible by, 1015
Ozone, cotton hydraulic architecture and, 1649

P

p40-like protein, in *Arabidopsis thaliana*, 446
p33 and p35 annexins, in corn root tip, 1391
Papaver somniferum (*see* Opium poppy)
Papaya fruit, metallothionein-like protein in, 1736
Paraquat, salt stress and, in cotton, 803
Parasitic nematode, phloem unloading induction by, in *Arabidopsis thaliana* root, 1421
Parsley
fungus-infected
rapid cell death in, 433
tissue distribution of mRNAs and proteins in, 131
jasmonate-inducible defense gene expression in, 183
Pea
cell wall invertase gene of, wound induction of, 1111
DIMINUTO homolog in, 862
embryo of, soluble and granule-bound starch synthase in, 89
eukaryotic ribosomal protein L9 homology in, 863
fruit of, growth of, auxin and gibberellin and, 53
leaf of
carbonic anhydrase and Rubisco expression in, CO_2 concentration and, 569
glycine decarboxylase complex in, 1523
lip1 mutant of, gibberellin status of, 61
pyrB3 in, 446
root of
defense-related ultrastructural modifications of, 919
ferredoxin-$NADP^+$ oxidoreductase in, 861
UDP-glucose transporter in, 1585
Peach fruit, pectin esterase in, 864
Pectin esterase, in peach fruit, 864
Pectin methylesterase, in tomato, 1398
Pepper (*see* Bell pepper)
Peroxidase
cell wall, ascorbate-stimulated onion root elongation and, 1119
Rhizobium-induced, in alfalfa, 1437
Peroxisome, of castor bean, isocitrate lyase in, 1457
Petal, of *Antirrhinum majus*, epidermal cell shape and pigmentation and, 879
petE gene, of *Synechococcus*, photosynthesis and, 1551
Petroselinum crispum (*see* Parsley)
Petunia flower, pollination-induced 1-amino-cyclopropane-1-carboxylate oxidase in, 503
pH, and *Dunaliella* plasma membrane H^+-ATPase, 1693
Phalaenopsis flower, pollination-induced senescence of, 863
Phaseolus vulgaris (*see* Bean)
Phenylalanine ammonia-lyase
in alfalfa stress response, 717
in *Bromheadia finlaysoniana*, 863
in tobacco, phenylpropanoid biosynthesis and, 1617
in wheat, 1398
Phenylalanine-indoleacetic acid conjugate, resistance to, in *Arabidopsis thaliana*, 735
Phenylpropanoid biosynthesis, tobacco phenylalanine ammonia-lyase and, 1617
Phloem unloading, parastic nematode-induced, in *Arabidopsis thaliana* root, 1421
Phosphate starvation
in *Brassica*
β-Glucosidase inducible by, 1399
pyrophosphate-dependent phosphofructokinase in, 343
in tobacco, aluminum tolerance in, 217
Phosphoenolpyruvate carboxylase, *Lupinus albus* root expression of, in phosphorus deficiency, 19, 31
Phosphofructokinase, pyrophosphate-dependent, in phosphate-starved *Brassica nigra*, 343
Phosphorus deficiency, in *Lupinus albus*
root carbon dioxide fixation in, 19
root development in, 31
Phosphorylation, of sucrose synthase, in corn leaf, 793
Photophosphorylation, ascorbate-stimulated, in spinach thylakoid, 1509
Photosynthesis
electron allocation in, in drought-stressed wheat, 265
gas exchange in, tobacco chloroplast carbonic anhydrase and, 319
light energy distribution in, in C_4 plants, 1055
respiration interaction with, in *Chlamydomonas reinhardtii*, 1005
in *Synechococcus*, *petE* gene and, 1551
temperature and, in bean, 1245, 1253
Photosystem I, cross-linking studies of, 409
Photosystem II-associated protein, in barley, 1398
Phototransduction pathway, light-responsive elements in, 1151
pHVCR21, barley and wheat gene and, 445
Phycobiliprotein components, in *Rhodella violacea*, 1045
Phytase, in corn root, 1429
Phytochrome
and gibberellin responsiveness of *Arabidopsis thaliana*, 337
and red light effect on *Arabidopsis thaliana* seedling development, 965
Phytophthora parasitica nicotianae, tobacco interaction with, lipoxygenase expression in, 997

Picea abies (*see* Norway spruce)
Pinus radiata, cinnamyl alcohol dehydrogenase in, 1397
Pisum sativum (*see* Pea)
Plant Gene Register, 445, 861, 1397, 1735
Plant physiology, as cross-disciplinary science, 1
Plasma membrane
of *Dunaliella*, H^+-ATPase in, structure and pH effects on, 1693
of rose, arabinogalactan protein heterogeneity on, 1261
Plasma membrane vesicle, of zucchini, orientation of naphthylphthalamic acid-binding protein in, 421
Plastid, of spinach, *sn*-glycerol-3-phosphate acyltransferase in, 1735
Plastid gene, cool temperature and, 585
Pollination
1-aminocyclopropane-1-carboxylate oxidase induced by, in petunia flower, 503
Phalaenopsis flower, senescence induced by, 863
Polyamines
in rice callus cultures, 1343
in tomato ovaries, 1237
Polyketide reductase, in *Glycyrrhiza glabra*, 864
Polysaccharide biosynthesis, pea UDP-glucose transporter and, 1585
Poplar
cinnamyl alcohol dehydrogenase in, 1479
leaf of, glutathione synthesis in, 1071
stem fasciation in, *rolC* gene expression and, 493
xylem of, *trans*-cinnamate 4-hydroxylase in, 861
Poppy, berberine bridge enzyme genes from, 1669
Populus (*see* Poplar)
Portea petropolitana leaf, carbon partitioning in, 393
Portulaca grandiflora, photosynthetic apparatus of, light energy distribution in, 1055
Potassium uptake, Na^+-coupled, physiological relevance of, 1609
Potato
abscisic acid deficiency in, heat induction of Pin2 in, 853
ADP-glucose pyrophosphorylase in, 1399
chloroplast of, transketolase structure in, 1736
fumarate hydratase from, functional expression of, in *Escherichia coli*, 1219
leaf of, abscisic acid-treated, lipoxygenase in, 446
potRb7 gene in, 862
tuber mitochondria of, deamino-$NADH^+$ oxidation in, ubiquinone induction of, 75
tuberization of
calcium-dependent protein kinase activity during, 1541
lipoxygenase gene expression during, 446
oxidative stress and, 1301
potRb7 gene, in potato, 862
Proline biosynthesis, in tomato, 862
Protein
metallothionein-like, in papaya fruit, 1736
waxy, in sorghum seed, 1735
Protein kinase, calcium-dependent, during potato tuberization, 1541
Proteinase inhibitor II, heat induction of, in abscisic acid-deficient potato and tomato, 853
Proton, permeation of, through chloroplast lipid membrane, 759
Protoplast, of flax, immobilization of, in agarose and alginate beads, 1191
Purine synthesis, by *Arabidopsis thaliana*, 905
pyrB3, in pea, 446
Pyrophosphate-dependent phosphofructokinase, in phosphate-starved *Brassica nigra*, 343

R

rab16B promoter, in rice, abscisic acid-responsive elements in, 483
Radiation (*see also* Ultraviolet-B radiation)
Radish seed, de-N-glycosylation enzymes in, 259
Raphanus sativus (*see* Radish)
Red beet
intrinsic proteins in, 861
mitochondria of, inducible NAD(P)H dehydrogenase in, 607
stomatal guard cells of, totipotence of, 889
Red light, *Arabidopsis thaliana* seedling development and
cytokinin, 901
phytochrome and, 965
Respiration
photosynthesis interaction with, in *Chlamydomonas reinhardtii*, 1005
of soybean mitochondria, CO_2 elevation and, 1349
Rhizobium
nodule formation induced by, signal transduction in, 447
peroxidase gene induced by, in alfalfa, 1437
Rhizoferrin, iron from, gramineous plant uptake of, 1273
Rhodella violacea, phycobiliprotein components in, 1045
Ribulose-1,5-bisphosphate carboxylase/oxygenase
in pea leaf, CO_2 concentration and, 569
transcription of, in *Arabidopsis thaliana*, 43
Rice
abscisic acid-responsive elements in, 483
callus of, polyamine accumulation and morphogenesis in, 1343
cool temperature-induced chlorosis in, 585
C-type cyclin in, 862
embryo of, ferredoxin-$NADP^+$ oxidoreductase in, 1399
endosperm of, ADP-glucose pyrophosphorylase in, 1399
gibberellin-induced receptor-like kinase in, 1397
Ripening
of apple fruit, 1-aminocyclopropane-1-carboxylate synthases in, 1736
fruit-specific defensin and, in bell pepper, 615
rolC gene, *Populus* stem fasciation and, 493
Root
of *Arabidopsis thaliana*, parasitic nematode induction of phloem unloading in, 1421
of barley, nitrate efflux system in, 1167
of corn
annexins p33 and p35 in, 1391
arenchyma formation in, ethylene biosynthesis and, 1679
cell wall biosynthesis in, 3,7-dichloroquinolinecarboxylic acid and, 1383
hypoxically inducible lactate dehydrogenase in, 1015
oxygen deprivation of, alcohol dehydrogenase-1-β-glucuronidase in, 685
phytase in, 1429
of cotton, water transport in, ozone and, 1649
development zones in, 3
of *Lupinus albus*
carbon dioxide fixation by, in phosphorus deficiency, 19
in phosphorus deficiency, 19, 31
of onion, ascorbate elongation of, 1119
of pea
defense-related ultrastructural modifications of, 919
ferredoxin-$NADP^+$ oxidoreductase in, 861
of *Rumex palustris*, formation of, ethylene-mediated auxin sensitivity and, 1687
of soybean, aluminum entry into, 1289
of *Thlaspi*, zinc absorption by, and translocation of to shoot, 1715
of tomato, auxin metabolism in, salt stress and, 379
of zucchini, impaired growth of, ascorbate metabolism and, 1135
Root hair, of *Arabidopsis thaliana*, electrical properties of, 1089
Rose, plasma membrane of, arabinogalactan protein heterogeneity on, 1261
Rpg4, soybean response to syringolide dependence on, 297
Rubisco (*see* Ribulose-1,5-bisphosphate carboxylase/oxygenase)
Rumex
in drained *vs.* submerged, ethylene biosynthesis and accumulation in, 229
root formation in, ethylene-mediated auxin sensitivity and, 1687

S

SAC1 gene, ATP sulfurylase control by, in *Chlamydomonas reinhardtii*, 669
Saccharum officinarum
aluminum toxicity of, 1101
photosynthetic apparatus of, light energy distribution in, 1055
Salicylic acid transport, in cucumber infected with tobacco necrosis virus, 787
Salix discolor, chloroplast of, thylakoid-bound isoprene synthase in, 171
Salt sensitivity, of *Chlamydomonas reinhardtii* mutant, 99

Salt stress
antioxidant response to, in cotton, 803
auxin metabolism and, in tomato, 379
calmodulin-like protein and, in *Dunaliella salina*, 863
Sansevieria hahnii, leaf of, carbon partitioning in, 393
Schefflera arboricola, foliar antioxidant systems in, growth irradiance and, 1631
SecY protein, in spinach chloroplast, 863
Seed
of *Arabidopsis thaliana*, small heat shock protein in, 747
of radish, de-N-glycosylation enzymes in, 259
of sorghum, waxy protein of, 1735
Seedling
of *Arabidopsis thaliana*
cytokinin restoration of gravitropism to, 901
light control of, 871, 901, 965
of pea, cell wall invertase gene of, wound induction of, 1111
of soybean, mitochondrial glutamate dehydrogenase from, 1357
Senescence
in *Arabidopsis thaliana*, 705
leaf in, chlorophyll breakdown in, 1403
pollination-induced, of *Phalaenopsis* flower, 863
Serine
metabolism of, in *Arabidopsis thaliana*, 207
mutation of, in soybean, atrazine resistance and light stress and, 1499
Sesbania rostrata
early nodulin gene *SrEnod2* in, transcriptional regulation of, by cytokinin, 559
histone H4 cDNA in, 1398
Sesquiterpenoid biosynthesis, in tobacco, 311
Setaria virdis, photosynthetic apparatus of, light energy distribution in, 1055
Shoot, of cotton, water transport in, ozone and, 1649
Signal transduction
by gibberellin, genetic analysis of, 11
phototropic, in *nph 1 Arabidopsis thaliana* mutants, 291
in *Rhizobium*-induced nodule formation, in legume, 447
Sinapic acid ester metabolism, in *Arabidopsis thaliana*, +1625
SLR1 gene promoter, in *Brassica oleracea*, functional analysis of, 1601
Sodium-coupled K^+ uptake, physiological relevance of, 1609
Solanum tuberosum (*see* Potato)
Sorghum, seed of, waxy protein of, 1735
Soybean
Bacillus thuringiensis in, recovery and characterization of, 121
cysteine proteinase inhibitor genes in, wounding and methyl jasmonate and, 1201
hypocotyl of, glutathione *S*-transferase in, 1185
LEA5-like protein in, 1398
leaf of, γ-glutamyl hydrolase in, 862
mitochondria of
glutamate dehydrogenase from, 1357
respiration of, CO_2 elevation and, 1349
nodule development in, glutamine synthetase activity during, 1723
root of, aluminum entry into, 1289
Rpg4-dependent syringolide response of, 297
serine mutation in, atrazine resistance and light stress and, 1499
sulfur nutrition and redistribution in, 623
UDP-glucose dehydrogenase in, hemicellulose biosynthesis and, 1127
Spinach
chloroplast of
coenzyme A-binding protein in, 1641
SecY protein in, 863
CP47 in, 446
cysteine synthase isoforms in, 273
photosystem I of, cross-linking studies of, 409
plastidal *sn*-glycerol-3-phosphate acyltransferase in, 1735
thylakoid of, ascorbate-stimulated photophosphorylation in, 1509
Spinacia oleracea (*see* Spinach)
Spruce needles, sucrose-phosphate synthase in, annual changes of, 641
Squash (*see* Zucchini)
SrEnod2 early nodulin gene, of *Sesbania rostrata*, transcriptional regulation of, by cytokinin, 559
SRG genes, in *Arabidopsis thaliana* senescence, 705
Stapelia gigantea, leaf of, carbon partitioning in, 393
Starch synthase, in pea embryo, soluble and granule-bound, 89
Stearoyl-acyl-carrier protein, in *Elaeis guineensis*, 1399
Stem, of *Populus*, fasciation in, *rolC* gene expression and, 493
Stomatal closure, in flooded tomato plants, 239
Stomatal guard cell, of red beet, totipotence of, 889
Stress response (*see also specific stressor*, e.g., Drought stress)
of alfalfa, 717
Sucrose synthase, phosphorylation of, in corn leaf, 793
Sucrose-phosphate synthase, annual changes of, in Norway spruce needles, 641
Sugar, tomato H^+-ATPase gene regulation by, 1229
Sugar beet (*see* Red beet)
Sulfur
nutrition and redistribution of, in soybean, 623
spinach cysteine synthase isoform expression and, 273
Superoxide dismutase, Cu/Zn, in wheat chloroplast, 1738
Superoxide dismutase promoters, in tobacco, 525
Synechococcus
bicarbonate transport in, 1573
dissolved inorganic carbon transport in, ethoxyzolamide inhibition of, 79
Mg-protoporphyrin IX monomethyl ester (oxidative) cyclase in, 105
NarL homolog in, 1398
petE gene of, photosynthesis and, 1551
Syringolide, *Rpg4*-dependent soybean response to, 297

T

Temperature
chlorosis and, in rice, 585
photosynthesis and, in bean, 1245, 1253
Thlaspi, zinc absorption and translocation in, 1715
Threonine synthase, in *Arabidopsis thaliana*, 863
Thylakoid
in chlorophyll-deficient wheat, 821
isoprene synthase bound to, in *Salix discolor* chloroplast, 171
of spinach, ascorbate-stimulated photophosphorylation in, 1509
Tobacco
chloroplast of
carbonic anhydrase in, gas exchange and isotope discrimination in, 319
Fe-superoxide dismutase in, oxidative stress tolerance and, 1703
glucose-6-phosphate dehydrogenase in, 861
4-coumarate:coenzyme A ligase in, 193
farnesyltransferase-β in, 1398
ipt transgenic, cytokinin in, 141, 1035
jasmonate-inducible defense gene expression in, 183
leaf of
Agrobacterium tumefaciens AKE10 infection in, growth and regeneration and, 939
NAD(P)H:(quinone-acceptor) oxidoreductase in, 249
ltp gene in, tissue-specific, 513
nitrate and nitrite reductase in, cosuppression of, 1447
phenylalanine ammonia-lyase in, phenylpropanoid biosynthesis and, 1617
phosphate-starved, aluminum tolerance in, 217
Phytophthora parasitica nicotianae interaction with, lipoxygenase expression in, 997
sesquiterpenoid biosynthesis in, 311
superoxide dismutase promoters in, 525
ubiC gene in, 4-hydroxybenzoate glucoside accumulation and, 811
Tobacco mosaic virus infection, metallothionein-like gene induction by, 353
Tobacco necrosis virus infection, in cucumber, salicylic acid transport in, 787
Tomato
abscisic acid deficiency in, heat induction of Pin2 in, 853
E8 gene of, ethylene biosynthesis and, 537
farnesyl-protein transferase in, 767
flooded, stomatal closure in, 239
fruit of
ferredoxin isoprotein distribution in, 651
sugar composition and size in, invertase gene and, 1321
glycopeptide elicitor binding site in, 1659
H^+-ATPase gene in, sugar regulation of, 1229
histone variant 3.3 in, 1397

3-hydroxy-3-methylglutaryl coenzyme A reductase gene in, 727
myb-related cDNA in, 445
ovaries of, arginase, arginine decarboxylase, ornithine decarboxylase, and polyamines in, 1237
pectin methylesterase in, 1398
proline biosynthesis in, 862
root of, auxin metabolism in, salt stress and, 379
wound-induced gene *twi1* in, 446
Transketolase, structure of, in potato chloroplast, 1736
Trifolium repens
metallothionein-like proteins in, 446
symbiotic N_2 fixation in, 575
Triticum aestivum (*see* Wheat)
Tuberization, of potato
calcium-dependent protein kinase activity during, 1541
lipoxygenase gene expression during, 446
oxidative stress and, 1301
twi1 gene, wound-induced, 446

U

ubiC gene, in tobacco, 4-hydroxybenzoate glucoside accumulation and, 811
Ubiquinone, induction of deamino-NADH oxidation by, in potato tuber mitochondria, 75
Ubiquitous β-amylase, in wheat leaf, 1737
UDP-glucose dehydrogenase, in soybean, hemicellulose biosynthesis and, 1127
UDP-glucose transporter, in pea, 1585
Ultraviolet-B radiation, solar, of *Datura ferox*, 161

V

Vacuolar targeting signal, of Brazil nut 2S albumin, 975
Vanilla planifolia, leaf of, carbon partitioning in, 393
Vicia faba, cysteine proteinase in, 862
Vigna unguiculata, VuA3 gene in, 861
Vinca major, foliar antioxidant systems in, growth irradiance and, 1631
VuA3 gene, in *Vigna unguiculata*, 861

W

Water
deficiency of, in wheat, photosynthetic electron allocation in, 265
transport of, in cotton, ozone and, 1649
Waxy protein, in sorghum seed, 1735
Wheat
aluminum resistance in, 591, 1471
cDNA clone pHVCR21 and, 445
chloroplast of, Cu/Zn superoxide dismutase in, 1738
drought-stressed, photosynthetic electron allocation in, 265
grain development in, endoprotease appearance in, 1211
leaf of, ubiquitous β-amylase in, 1737
Na^+-coupled K^+ transport in, 1609
phenylalanine ammonia-lyase in, 1398
thylakoid membranes of, in chlorophyll deficiency, 821
White lupin (*see Lupinus albus*)
Wounding
defense gene induction by
in bell pepper, 615
in parsley and tobacco, 183
metallothionein-like gene induction by, in tobacco, 353
pea cell wall invertase gene induction by, 1111
soybean cysteine proteinase inhibitor gene expression and, 1201
tomato *twi1* gene induced by, 446

X

Xylem, of *Populus tremuloides*, *trans*-cinnamate 4-hydroxylase in, 861
Xylem sap, stomatal closure and, in flooded tomato plants, 239
Xyloglucan *endo*-transglycosylase homolog, flooding-induced, in corn, 385

Y

Yeast, aluminum toxicity in, 1101

Z

Zea mays (*see* Corn)
Zinc, absorption and translocation of, in *Thlaspi*, 1715
Zinc superoxide dismutase, in wheat chloroplast, 1738
Zucchini
plasma membrane vesicle of, orientation of naphthylphthalamic acid-binding protein in, 421
root growth inhibition in, ascorbate metabolism and, 1135
